### **Nutraceutix, Inc. Achieves NSF International Good Manufacturing Practices (GMP) Registration**

Redmond, WA and Lafayette, CO – Nutraceutix, Inc., a leader in premium probiotics and nutraceutical contract manufacturing, is pleased to announce Good Manufacturing Practices (GMP) Registration through NSF International's Dietary Supplement Certification program. Nutraceutix's Colorado manufacturing facility successfully met all requirements included in NSF's GMP Registration Program.

GMPs are regulatory requirements that provide guidelines for necessary processes, procedures and documentation to assure the product produced has the identity, strength, composition, quality and purity it is represented to possess. NSF conducted a plant audit to verify compliance with GMPs and will conduct periodic audits at the Nutraceutix Colorado manufacturing facility to ensure continued conformance. GMPs for the current NSF Dietary Supplements Program are included in NSF American National Standard 173-Dietary Supplements, the only American National Standard for Dietary Supplements.

Nutraceutix's GMP registration reflects their continued commitment to ensuring quality and satisfaction and gives companies confidence that their organization operates in conformance to established GMPs. For meeting GMP requirements, Nutraceutix receives a NSF GMP registration certificate and is listed on the NSF Web site.

"We've followed GMP guidelines for many years and are very pleased to have demonstrated, via this recent professional NSF audit and Registration, our continuing commitment to quality manufacturing practices." Steve Moger, President and CEO of Nutraceutix, added, "This commitment shows in the outstanding products we manufacture and, importantly, in the many strong relationships we have with quality conscious customers."

NSF International, an independent, not-for-profit organization, helps protect you by certifying products and writing standards for food, water, air and consumer goods ([www.nsf.org](http://www.nsf.org)). Founded in 1944, NSF is committed to protecting public health and safety worldwide. NSF is a World Health Organization Collaborating Centre for Food and Water Safety and Indoor Environment. Additional services include safety audits for the food and water industries, management systems registrations delivered through NSF International Strategic Registrations, Ltd., organic certification provided by Quality Assurance International and education through the NSF Center for Public Health Education.

Nutraceutix manufactures nearly twenty naturally occurring probiotic strains in bulk, and incorporates the superior, patented LiveBac® extended shelf-life process and patent-pending BIO-tract® gastric acid bypass technology into custom probiotic tablets for customers. Nutraceutix also custom manufactures premium controlled release nutritional supplements including Glucosamine, Vitamin-C, Niacin and many others. Nutraceutix delivers bulk powders, capsules or advanced tablets in bulk or finished bottles for quality conscious private brands and retailers.
